Abstract: The Education Longitudinal Study of 2002 is a nationally representative study of two high school grade cohorts (spring 2002 tenth-graders and spring 2004 twelfth-graders) comprising over 16,000 sample members. The study focuses on achievement growth in mathematics in the high school years and its correlates, the family and school social context of secondary education, transitions from high school to postsecondary education and/or the labor market, and experiences during the postsecondary years. Major topics covered for the postsecondary years include postsecondary education access, choice, and persistence; baccalaureate and sub-baccalaureate attainment; the work experiences of the non-college-bound; and other markers of adult status such as family formation, civic participation and other young adult life course developments. Data collections took place in 2002, 2004, 2006 (two years out of high school), and now will take place in 2012, when most sample members are around 26 years of age. This submission requests OMB's approval for the third follow-up 2011 field test and a 60-day federal register waiver for the 2012 full scale clearance.
